Cape Breton University

Mechanical Engineering Design, Advanced Diploma
George Brown College, Toronto

Projects

YoTixx app (Self Started Project)

Nov 2020-Present

- Created a mobile app where users can search for any upcoming events. Users are able to view event details and tickets available.
- Used MERN (Mongo, Express.js, ReactNative, Node.js) stack to build both frontend and backend
- Integration of third party APIs such as ticketmaster , stubhub , Maps JavaScript API and much more
- Gained greater knowledge of react hooks such as useEffect, useContext, useState and more
- Added firebase Authentication to identify users when signing in .

Tracker app (Self Started Project)

Nov 2020-Nov 2020

- Developed a tracker app that can track and create a map of a user's routes.
- Used React Native, React Elements, Axios and js for front end
- User MongoDB to store client-side data

Developer (Group Project)

Jan 2020 – Jul 2020

- Worked with a team of six to create an application that mimics spotify web app
- Application was built using node, express server, mysql database, and Spotify web api
- Gained a lot of knowledge working with git workflow
- Ability to create databases and tables with MySQL database manage system
- Very familiar with MVC stack

Technical Skills

Software Skills:

JavaScript, HTML, CSS, JQuery, Bootstrap, Node.js, MySQL, Mongo, Express.js , React, React Native , CAD

Source Control: Git(GitHub)

Personal Skills

- Ability to work autonomously and as a team player
- Excellent time management and organization skills
- Quick learner with various new devices, software and programming languages
